“CRITICAL DRIVER TRAINING IN SMALL AREAS” TAKES A GIANT LEAP FORWARD

VR Motion Corporation and Skidcar System, Inc. Sign Exclusive Agreement for
Military and Law Enforcement Driver Training

Las Vegas, NV, January 9, 2018– VR Motion Corporation, a Hillsboro, OR based enterprise VR start-up, and Skidcar System, Inc., a Las Vegas, NV based driver training system provider, have signed an exclusive agreement that allows Skidcar System, Inc. to incorporate VR Motion’s new VR driver training software platform into their line of successful SKIDCAR™ and SKIDBIKE® based driver training curriculum. Skidcar System, Inc. has a 30 year history of providing world-class training and equipment to military and law enforcement clients. VR Motion’s leading-edge software allows drivers to quickly learn how to interact with all types of vehicles and the latest vehicle technology, including autonomous vehicles, trucks, military equipment and any type of road vehicle made.

“Our agreement with such a well-respected company like Skidcar System, Inc. is a perfect opportunity for us to introduce this new technology to the world, as their long-standing network of clientele is extensive,” said Keith Maher, co-founder and CEO of VR Motion Corp. “VR Simulation as a training tool married to the SKIDCAR SYSTEM® is a truly disruptive technology package that offers practical training solutions to difficult training environments.”

“We see a great deal of potential for virtual reality technology solutions for driver training and assessment,” said Dane Pitarresi, President and CEO of Skidcar System, Inc. “We are excited to integrate VR Motion’s immersive VR platform into our unique training programs, which have become the industry standard.”

The newest driver training technology package that include simulation, technically correct physical validation with Skidcar, and thought-based exercises featuring the ATSS Light System, is available now from Skidcar System, Inc.
